**Keywords**— language, world language, national language, state language, linguistics, the quality of education, preschool education.

## 1. INTRODUCTION

Language is the more indescribable from history of mankind, it is more imperative to study it ,to become acquainted with its industries.

There are about seven thousand languages in the world, each of which is the basis of a certain national culture and national mentality , each of which is a priceless treasure with it's own mysteries.

Language is the pilar and foundation of the spiritually of this nation, no matter what nation it belongs to . Representatives of different nationalities live in our country as citizens of the big state. Due to the fair language policy formed in our country ,education is provided in seven languages.

It has been 31 years since Uzbek became official state language in the Republic of Uzbekistan. On October 21,1989, the Supreme Soviet of former Soviet Union of Uzbekistan adopted "The Law on the State language of the former Soviet Union". The historic event was a worldwide news for the multinational peoples living in the Uzbekistan.

After the Independence of Uzbekistan in 1995,the main document on the state language was updated .

The Uzbek language, one of the oldest and richest languages in the world ,is a symbol of national identity and independent statehood for our people is the great value that is coming. Over the years, our native language has gained a solid legal basis and a high status.

Today, the Uzbek language is used in all spheres of life ,in the spheres of state and public administration, interstate relations,science, medicine,education,culture and art ,and is widely heard in the international arena. In particular, "The Decree of the President of the Republic of Uzbekistan" dated October 21,2019 " On measures to radically increase the prestige and scale of the Uzbek language as the state language " is currently in force. I am confident that the program will continue to be implemented. Because the mother tongue is the soul of the nation. Language is the symbol of the state,its property. If the law on the state language is not adopted, the national language, which brought up such great people as Ibn Sina, Beruni, Al-Kharazmi,Al-Fargani,Alisher Navoi,Amir Temur,Babur ,will be lost . I am not mistaken in saying that the law on the state language ,while fully reflecting the richness and beauty of our native language, has led to an increase in the international prestige of our language.

Not all nations in the world have a national language. Because it has to do with the national independence of nations. According to expert evidence, one language is missing every two weeks today. This, in turn ,means that the people who speak the same language will also disappear.

According to linguistics, after about 25 years ,one in ten of the languages used today will survive. Hundreds of thousands of people speak each of the 90% of the available languages. Scientists estimate that at least one million people need to speak this language in order to survive. It is gratifying for us that our language is one of only 250 of these languages in the world.

When children stop reading and writing in their mother tongue ,that language is on the verge of extinction.

While acknowledging that the government and the Head of the state pay special attention to the field of preschool education, creating conditions to improve the quality and efficiency of education, experts, teacher, and staff working in the field of preschool education today, keep pace with the times. Our state and parents are trying to justify their trust.

It should be noted that the formation of the language, as well as the fact that "The Homeland begins at the threshold ",and its transmission to the future while maintaining its purity ,begins with the family and kindergarten. Preschool education is the main foundation that ensures the fulfillment of this responsible and honorable task. In this regard, it is safe to say that today it is

necessary to pay more attention to the knowledge, experience, professional skills of employees working in the field of preschool education, the factor of knowledge of the developing staff at the level of world standards.

**Conclusion.**

Language is the wealth of our nation, history ,our future ,our destiny. We must not forget that it is the spiritual duty of each of us to preserve its impressive status ,beauty, grace, to pass it on to the next generation in a pure form.
