

Raising Legal Awareness and Legal Culture in Society

Hamzaev Tillobek

Karakalpak State University
Faculty of Law 2 course student.

Annotation: *The increase of legal awareness and legal culture is achieved through the increase of legal knowledge. As a result, citizens can make a significant contribution to the development of society by learning about their constitutional rights and freedoms and their obligations to the law.*

Keywords: Legal consciousness, legal culture, legal education.

Raising the legal awareness and legal culture in the society, ensuring the rule of law and strengthening the rule of law are not only the representatives of the legal profession, but also of all professions, from housewives to housewives working for the development of our country. is one of the most important priorities of citizens. Ignorance of the duties, rights and freedoms set forth in the law leads to spiritual poverty. As a result, both the people and the society will stop developing. The legal awareness, legal culture and legal activism of citizens ensure the rule of law and lay a solid foundation for the state. Because in a country with a high level of legal awareness, respect for the law and the rule of law are ensured. The rule of law is a key feature of a democratic state. Raising the level of legal awareness and legal culture of citizens is the most important factor for the state.

In this regard, the First President of the Republic of Uzbekistan Islam Karimov said: "Every citizen, every person should know his rights and be able to protect them. Equipping people with legal culture, legal awareness and legal knowledge should be one of the main tasks. As long as every member of society does not know his rights, duties and responsibilities, all our words and efforts about reform and renewal will be in vain. we find that z finds the expression.

In particular, legal consciousness and legal culture are one of the key factors determining the place, present and future of each individual in society. The high level of legal awareness and legal culture of the members of the society can be determined by the extent to which they comply with the requirements of the law.

Failure can be expressed in two ways:

The first case is ignorance of the law and the law

The second condition is not knowingly following.

If everyone in our society consciously accepts the role of the created laws in our lives, obeys them voluntarily, it will serve the development of the country, ensuring the rule of law. Those who do not know the law, on the contrary, ignore the law and do not know their rights and responsibilities, which hinders the development of society. It is necessary to effectively fight against the ignorant and uncultured people who are axing the feet of the legal society, which is at the decisive stage of its rise, and to educate and bring up from an early age a sense of patriotism in the hearts of young people. Indeed, when it comes to education and upbringing, it serves as the main tool that shapes consciousness and culture. If legal literacy, legal norms, legal ideology, legal mentality are gradually formed in a person, all ideas and knowledge about law will appear spontaneously. By the way, the National Program states that legal education is continuous and should be taught from an early age. Children become aware of the rules of behavior in preschool. Provides basic education and expands educational capacity on educational and legal norms. At the same time, education and upbringing are the main link in the formation of legal consciousness and legal culture. The implementation of this process requires serious efforts and respect for political and legal activism, genuine legal culture, as well as the priority of human rights and universal values. In his many speeches and speeches, the President emphasized the need to improve the system of legal education and said that on January 9, 2019, "to radically improve the system of raising legal awareness and legal culture in society. The Decree of the President of the Republic of Uzbekistan No. PF-5618 on the introduction of new innovative methods of organizing advocacy activities to raise the legal awareness and legal culture of the population is also important. legal culture, legal literacy is identified as the main task. In short, legal consciousness and legal culture not only help to protect the rights and interests of all types of professionals, but also help to increase the constitutional knowledge and skills of our citizens. it will also be of great help in building a stronger democratic state. Because, as the head of our state emphasized, we must form a legal culture in society so that the Constitution becomes a daily rule and a habit, not an obligation to obey the law, to respect the rights and freedoms, honor and dignity of others.
