**Abstract:** *The future begins in kindergarten! This article tells about the common responsibility for the upbringing of the younger generation, who are the early owners, what should be paid more attention in the formation of their humane qualities and what needs to be done about it.*

**Keywords**— kindergarten, humanity, virtue, upbringing, happiness, virtue, virtue

## 1. INTRODUCTION

The great thinker and poet Alisher Navoi pays special attention to the power and strength of upbringing in the development of every child. He believes that as a result of upbringing, the child will grow into a useful and mature person. Indeed, young children need to be raised from infancy. Education helps a person to develop good habits and humane qualities. The family environment plays a key role in this regard. If the family environment in any family is healthy, the upbringing of the child will also be perfect. Both father and mother have equal rights in the upbringing of children. When it comes to human qualities and education, first of all, every child should be taught upbringing from an early age. **What is Critical Thinking?**

What do we mean by humanity, what qualities should such a person have? Humanity is to love a person, to show him kindness, to share goodness, to honor a person. Humanism ("man" - Arabic ;, "parvar" - Persian-Tajik; "lik" - Uzbek - care for people, humanism) is also a struggle for the full manifestation of human dignity, freedom, abilities, human happiness, equality means striving to ensure a just life. When raising children in the spirit of humanity, first of all, if we bring them up well from an early age in a family environment, children will certainly look at life in a completely different way. When raising children, it is important to talk to them in the child's language, saying every word gently, which indicates that the child will quickly absorb the information they receive. It is necessary to be very careful when communicating with them. Because they are very imitative. Developments in children are taking place in the family and in the eyes of each of us today, most of whom learn what they have seen and heard from the age of one and a half to two years, and absorb them immediately. The child receives upbringing not only from the family, but also more from a preschool institution. Along with the family, pre-school educational institutions also play an important role in educating the younger generation in the spirit of humanity.

### The Importance of Critical Thinking

Further improvement of the system of preschool education in the Republic of Uzbekistan, strengthening the material and technical base, expanding the network of preschool educational institutions, providing qualified teachers, radically improving the level of preparation of children for school education, introduction of modern educational programs and technologies In order to create conditions for moral, aesthetic and physical development, the President of the Republic of Uzbekistan adopted Resolution No. PQ-2707 of December 29, 2016 "On measures to further improve the system of preschool education in 2017-2021." (1.B.1-2)

In accordance with this, the Resolution of the President of the Republic of Uzbekistan "On the organization of the Ministry of Preschool Education of the Republic of Uzbekistan" dated September 30, 2017 No PP-3305. (2.B.4-5)

Of course, the question arises as to why this ministry was established. So there is a need for it!

Our research has shown that the changes, developments and observations in our country show that in the past, the activities of the Ministry of Public Education in cooperation with public administration and local authorities were largely limited to the development of school education.

In this regard, today we need to radically improve the activities of preschool education institutions, increase the coverage of preschool children across the country, learn best international practices, the creation of a modern system in all respects remains relevant.

**Time.** We all know that taking into account the interests and aspirations of children, the issue of their development in the spirit of love for the motherland by providing them with comprehensive education in preschool, expanding their worldview, instilling national and universal values in their hearts and minds is lagging behind. requires a review of the management system of preschool education.

**Permission.** How future generations go to school and grow up with high goals depends in many ways on the education in preschool institutions. Scientific observations

and research show that the idea that a person receives 70% of information about the world during his lifetime by the age of 7 shows the importance of the role of preschool education in the development of the child's personality.

**Variety.** At a meeting held by the President of the Republic of Uzbekistan Shavkat Mirziyoyev on August 16, 2017 in order to radically reform the system of preschool education, to organize the management structure of the system, to identify and consider measures to cover 100% of children aged 5-6 On the organization of the Ministry of Preschool Education of the Republic of Uzbekistan.

**Activity.** As the head of our state noted, this sphere will be headed by a real owner of this profession, who is highly educated, literate, loves this profession and sincerely loves children. This, however, is a testament to the endless attention paid to preschoolers and the wide range of opportunities being created! The Ministry of Preschool Education is responsible for the education of our pre-school children, their upbringing, care for their health and the formation of the worldview of the owners of tomorrow. . Engaging in the upbringing of preschool children is one of the main tasks of all of us, especially the staff of cultural institutions. After all, we are all responsible for the upbringing of the younger generation. The role of culture and art is important in the upbringing of a conscious, thoughtful and worldly, spiritual beauty.

**Risk.**The role of all clubs operating in cultural centers, as well as theater studios is great, in order to increase the interest of preschoolers in culture and art and to show their undiscovered aspects. One of the modern requirements is to create new performances that will have a positive effect on the psyche of children, to bring them more joy in life, to give them spiritual and educational nourishment, and to present them to children in the brightest colors in a modern interpretation.

**Appreciation.** It is also good to involve children in large and small events organized by cultural centers and to develop children's interest in art. Cultural centers should organize performances, concert programs, colorful, fun performances for children that are appropriate for their age. If only every district had Puppet Theaters, they would be able to present new performances that are of great educational value to preschool children.

**Value.**This leads to a special positive mood in the child. Another issue is that if we pay close attention, children will rush to fly in their favorite attractions as soon as they visit the parks. We know that there are many different attractions in cultural and recreational parks. When we observe a lot, children often sit in a chair with animals depicted in the attractions, such as horses, deer, and so on. Of course this is a sign of goodness because the Horse is a symbol of goodness.

**Exchange of views.** The picture of the animals he depicts also has a special educational value. There are such attractions that young children, who are depicted with

pictures of wild animals, are afraid of them. So, we come to the conclusion that the officials of the industry should pay special attention to this process. As the head of state said: - The future begins in kindergarten! Humane society needs a humanitarian ideology. Compassion is the highest form of humanity. The source of this glorious nobility in man is intellect and wisdom, compassion, courage and purity. In this sense, it is noteworthy that the recognition of man as a supreme value and a high level of respect is one of the main goals and important requirements of our national ideology. We are all equally responsible for the future development of the naturalizers of preschools who own them early!
