Abstract— *In this article, the good word of each nation is its language, the unique role of the Uzbek language in the international arena, which is the product of centuries-old cultural, scientific, educational and artistic thinking of the Uzbek people. In addition to fully reflecting the beauty and charm of our native language, we also mention the wide range of opportunities for its development on a scientific basis.*

Keywords— language, state language, Uzbek people, Alisher Navoi, motherland.

1. INTRODUCTION

The life, which shows the existence of every nation in the world, is language and literature. To lose the national language is to lose the spirit of the nation.

Abdulla Avloni.

Our great ancestor A.Navoi said, "Language is a tool of speech with so much honor. If speech is inappropriate, it is a disaster for the tongue." The emphasis on language, which began in the distant past, has not lost its prestige. Just as every nation and state has its own language, our native Uzbekistan has its own language, which our country achieved before independence. The fact that our country gained the state language was the key to independence. Let's talk about our language, which is the means (cause) for us to achieve such blessings. Let's also talk about language education and learn about language disasters and their harms.

Language rises first and foremost with culture. His impressive power is incomparable. Language is the history, culture, way of the people. Because of this sacred, sacred language, the hands are united and the bonds of friendship are connected. As our great ancestor Alisher Navoi said, "Language is the key to the heart and know the key word of the heart." What we say is an expression of our thoughts, and our kind language is an expression of kindness.

There is a saying among our people that language is the spiritual mirror of the nation. Language is not only a tool for the problem, but also the culture, customs, way of life and history of the people. Respect for the languages of different peoples, in turn, promotes mutual understanding and communication. It is because of language that humanity is proud to belong to this or that nation. Therefore, recognition and respect for all languages is the only guarantee of peace.

"Each of us must consider the attention to the state language as the attention to independence, the respect and loyalty to the state language as respect and devotion to the motherland, and make such a view a rule of our lives. We must all start this noble movement from ourselves, our families and communities, show respect for our native language, traditions and values, and show our love for the Motherland in practice," said President of the Republic of Uzbekistan Shavkat Mirziyoyev.

It should be noted that the granting of Uzbek the status of the state language was one of the important steps of our people on the path to national independence. During the years of independence, as in all areas of our country, significant changes have taken place in the development of our language. The Uzbek language, which we are proud of, has gained an international reputation. The participation of the President of the Republic of Uzbekistan Shavkat Mirziyoyev in the 75th session of the UN General Assembly, not in one of the six official languages, but in Uzbek, is a clear proof of the above.

In order to enhance the status of the Uzbek language as the state language, to raise our national spirituality and to form a high respect for the Uzbek language among young people, President Mirziyoyev adopted the Law of the Republic of Uzbekistan "On the State Language". Resolution of PQ-4479 of October 4, 2019 "On the celebration of the anniversary of the Uzbek language" and PF-4479 of October 21, 2019 "On measures to radically increase the prestige and status of the Uzbek language as the state language" Decree No. 5850 was signed.

According to the Decree of the President of the Republic of Uzbekistan Shavkat Mirziyoyev dated October 21, 2019 "On measures to radically increase the prestige and status of the Uzbek language as the state language", the Uzbek language is a political, legal, socio-economic, is actively used in the spiritual and enlightenment spheres, and is heard in the international arena. There is a growing interest in our language and its study in foreign countries.

In conclusion, we have a lot of national heritage left by our ancestors for future generations. Works that call for the harmony of spiritual and cultural life, scientific and cultural heritage inspire our generation to perfection, unity and nobility. Therefore, we must pay more attention to them, strengthen the independence of our country and strengthen the foundation of our national culture through the instructions given to them.
