**Abstract:** *This article is dedicated to women's marriage with foreigners that is considered as a vital topic not only in Uzbekistan but also in other countries and major disadvantages that are being brought with the help of this marriage and gives some suggestions about the ways which help women to increase their position in society in order to prevent this kind of marriage and not to meet with below mentioned issues.*

**Key words:** foreigners, marriage, issues, language barrier, increase position in society, misunderstanding, alternative solutions, homesickness, cultural shock

For the time being, if we look with a careful consideration, we see in cycling that most women who are not able to recognize their significance in their homeland get married to men who are from another countries and from my point of view, it is extremely essential topic to discuss so that everyone has to pay attention to its side effects. Creating different vacancies and providing females with a job in their own countries and increasing their position in society can be one of precise solutions.

Actually, discussing about this marriage seems unreasonably. However, I have noticed that this marriage leads to numerous issues in the not distant future. Followings are recognized as major problems:

Homesickness -after getting married women have to live with their couples and they will be away from dears and nears. It can put a lot of relationship pressure on them. It takes much time to meet.

Cultural shock -is always known as a great problem. Many people who do this find it hard to cope with food, lifestyle, traditions and wearing style also.

Language barrier-not knowing well foreign languages provokes misunderstanding especially among women who grew up in the rural areas where the education is a bit poor.

Religious looks-in Muslims it is not allowed women to have a relationship with Atheist or Christian men so it can also be a problem.

Differences in bringing up children- parents come across difficulties while giving education owing to various backgrounds.

Forgetting the native language- this situation occurs by living in other countries where they have not been able to hear their native speech for many years.

Accepting values that are various- they will come and be forced to accept them because of the sake of tradition.

Misunderstanding- their spouse can not fully understand who they are no matter the love.

Acceptance-these women will never be accepted by the people in their spouse's life.

The main reasons of this type of marriage may be lack of money as a result of unemployment and being uneducated. To make more clear most foreigners have a habit of offering money to women to persuade them to marry. In order to avoid above mentioned problems women's position must be increased in society. Luckily, in Uzbekistan countless opportunities are given to females by government with the help of President Shavkat Mirziyoyev. Alternative solutions can be to make girls more educated, knowledgeable and provide with professions and parents should be persuaded to give permission to the girls to learn and create enough chances in the house condition. Because there are some parents who fail to perceive like girls' education is not as important as boys (Qiz bola birovning hasmi, eri boqib oladi). By taking knowledge all females can easily find their position, job and they never lose the level of significance and they do not need to marry to foreigners.

To sum it up I tend to say that from ancient times women have been appreciated and played a key role in every part of the globe. There are some talented women among us who need a great encouragement for the first step to work. Tell the truth, there are also advantages of marrying to foreigners like traveling, broadening horizon, knowing about other cultures and traditions. However, the disadvantages outweigh from its advantages in that case. Our country has enough chances to work, to get a job and increase our position in society—they are just in our hands to touch.
