

# The Role of Five Initiatives in the Organization of Preschool Education in the Life of Educating Children

Vokhida Kodirova Salimovna

Educator of 28th State School  
Organization of preschool education in Gijduvan  
District of Bukhara region

**Abstract:** *In this article, the role and tasks of the five initiatives in the work activities of the preschool education organization are mentioned, five initiatives are mentioned, each educator should implement in the process of his / her work activity and the role of this process in the life of children after the activity the child's mental and spiritual development will help him / herself Each of the five initiatives has been given an understanding of its functions, directions, and the views on how s can be integrated and implemented into the child's mind spirituality. It was noted that from the Organization of preschool education of children , it is necessary to carry out the works of understanding the correct use of music, art, sports, professional, modern technologies.*

**Keywords:** five initiatives, Organization of preschool education, music, sports, nationality, talent, skill, development, child consciousness, spirituality.

## I. INTRODUCTION

In the organization of preschool education, children are involved in educational upbringing processes in different directions. Different processes depend on the skills and methodology of the educator. One of the main tasks of each pedagogical worker is the upbringing of children as they grow up, the development of our future, responsible for the upbringing of children. In order to facilitate the implementation of such important tasks, I believe that the organization of "five initiatives" by the president of our country has taken a more important place.

When working with a whole group of five initiatives, the results will be very good, because every child has an important time to develop spiritually, mentally, what profession he will occupy in the future is his childhood ,because all the knowledge that is important for life will be occupied by him at the age of attending preschool education in the organization.

## II. METHODOLOGY

I would like to answer the question of what five subjects will give to children in preschool education. The pedagogical staff, each skilled and doing their job in love, support five subjects throughout a whole day at organization of preschool education, if done, the five initiatives would be understood to have the role of in the life of the child ,because for a whole day each child shows himself in an open position his talent, skill and all the interests that he has in himself ,without knowing it, and this would have made it very easy for each child to find his place in

**First initiative: it serves to unleash the talents of young people to increase their interest in music, painting, literature, theater and other types of art.**

Exactly the first initiative causes the implementation of the most ardent hobbies and activities of the children I recommend to perform the first impression with the children of the whole group these are the ones that if there are twenty children in the group, then some of them go to the music , and some to the painting, and some to the literature ,to the As noted by the president of our country, the early detection of children's develops it, these effects serve very well .usually in a Pre-School Organization, many children are able to better imitate the imitation of someone or the act, to imitate the talent of such children if it is promoted and developed great figures of art, the performance of theater masters should not be left to anyone in doubt .Put in the children's Music Hall, put on a very cheerful Taron and watch no matter how shockingly and dancing the music all the child will not dance , because not everyone is interested in music and dancing, not every child is interested in a musical instrument that he likes, does not try to play it out on his hands , or if you give a moose pen to any child's hand ,it will not be very beautiful because not everyone is interested in something, because every child also has a strong interest.

### III. ANALYSIS AND RESULTS

**The second initiative: aimed at physical conditioning young people, creating favorable conditions for them to demonstrate their abilities in the field of sports.**

**SPORT is a great heritage that our blood has absorbed into our blood.** In the minds of children it is necessary to impregnate from the Organization of preschool education, that in ancient times the great commanders, who knelt down the whole world, were descendants of Amir Temur, Jalaliddin Manguberdi, Pahlavon Mahmud from the land of Uzbekistan. Respected educator educators understand very well how important is the role of sports in the Organization of preschool education, the role of sports for the formation of a healthy lifestyle is overwhelming in every behavior of the child. Mode of work with the child during the day mode of travel, tempering in the water, tempering in the sunlight, proper nutrition compliance with the regime time of sleep of the child , taking him for an evening walk, organizing the second half of the day the place of sports in the organization of entertainment games is well understood by every educator , in addition to It is very important to organize sports clubs together with the children who are attending the organization of preschool education and to provide it with a sports coach with various conditions for tempering them and demonstrating their abilities, it is necessary to support talented children to demonstrate their abilities to the states of the district, region, Republic, and other army.

**Third initiative: the organization of computer technology and effective use of the internet among the population and youth.**

The same third initiative is the department that provides children with breathing in time because all children sometimes learn from the computer internet and sometimes use it unknowingly by carrying out explanatory work from the same organization of preschool education, the awareness of children towards the bypass of their understanding about computer internet network, when we grew up, there was no doubt that our children would only use this direction correctly and that they would use the internet to change their lives only to the better side, not to get caught up in the good aspects ( spider web) a the same third initiative is the department that provides children with breathing in time because all children same organization of preschool education, the awareness of children towards the bypass of their understanding about computer internet network, when we grew up there was no doubt that our children would only use this direction correctly and that they would not get used to the not good sides of the internet ( spider web) but would use themselves to change their lives only to the good side dear educators do you think? Dear educators, what do you think ?

**The fourth initiative: is aimed at raising the morale of young people, organizing systematic work on the broad promotion of reading among them.**

The fourth initiative preschool organization is a very interesting and pleasant process for children ,if you have ever watched a child who is going to attend a preschool organization, the book will not flow but if you give pictures books, it will be tastefully watched, and he himself , without knowing, will begin to invent something ( stories, fairy tales, poems) looking at the picture and. Making picture books. I am sure that the children will correctly distinguish colors , analyze the situation depending on the reality, tell their independent opinion and develop the art of speech , here with the help of such picture books we can educate children in the spirit of love for the book, starting with the Organization of preschool education.

### IV. DISCUSSIONS

As our president has said “ it is not difficult to understand how true the idea that“ a child who reads a book now will be able to manage a child who sits in the future by watching ten TV shows.” Reading fairy tales of different nationalities during sleep of children in a preschool organization develops children's consciousness and enriches them even more tassels events and events that the child hears with his ear are fully formed in the at the end of a fairy tale or story he will be able to distinguish between positive and negative images freely and.

**Fifth initiative: the wife refers to the issues of employment of girls.**

In the organization of preschool education, many of our girls are found, who are very persistent, like Tamaris they are boiling-blooded, very we have girls with dexterity, dexterity and ability to manage if such girls are properly trained and supported our girls who are able to introduce the whole of Uzbekistan to the world will catch up with the I count.

## **V. CONCLUSION**

If you give importance to each of our provinces has its own unique clothes, traditions of national craft ,dishes such as the national ones introduced to children and taught in the future will provide for the development of self-worthiness and tourism will also serve. After all, now there are a lot of those who are interested in watching the ancient cities of Uzbekistan,

In general, every initiative will ensure the proper growth and development of the child and will play an important role in finding their place in the future life of directing them to the profession, starting with the School Organization of Education.
