Abstract- In this article some significance of taking CEFR are mentioned, as well as, the rules which we should obey in order to acquire certificate are given with explanation.

Keywords- CEFR, an advanced degree, “C2” level, schedule, high level, comprehension, motivational video, control, note, burden of responsibility, achievement.

1. Introduction

Knowledge is like a boundless ocean and we have a chance to solely gain a drop of this ocean. You may estimate yourselves as a versatile person who knows everything but this is out of truth. This is probably because, even great wise ancestors said: “I learnt that I had known nothing” despite of being famous all over the world, owner.

CEFR is similar to the stairs because of owning 6 different levels. You can go up by stepping on the stairs one by one. Nobody can immediately appear on the top of stair. With a view to achieving the best you have to practice a lot.

Let’s mention some rules which should be done in order to procure CEFR or be a perfectionist. Initially, you should aim at a degree which you truly want. As everyone you will probably choose the best level “C2” degree, do not worry it is good. Whenever you prefer an advanced degree, you have an idea on your mind that you have to work hard to get it.

The next thing which you should do would probably be planning your day. You may create a schedule which based on your tasks you have to do. However, be attentive to put everything in order. Supposing you appropriately organize your study, you can see the result soon.

It would be much better if your day begins with any kind of listening task in early morning. It helps you to become awake and come into “the gate of English”.

2. Main part

After coming, you can have breakfast by listening a motivational music or watching something in English. Then you can solve reading or grammatical tasks during the limit which you have to do. But the most imperative thing you should pay attention would probably be belief and good mood. If you can feel this, it gives enough energy and makes you work harder than as usual.

And after the limit of reading is over, you can go out to breathe fresh air and just rest a little and again continue lexical and grammatical comprehension task. If it is time to have lunch, you should do it, of course, with watching or listening something in English. You should take a nap after lunch. It gives your brain fell calm and it seems to you as “a charged battery”. After a little nap, in order to be wholly awake you can sing any English song which you keen on both listening and singing.

Then you should train with your speaking. If there is enough time, you can learn new words which you come across during the first half of the day, the period of doing reading and lexical tasks. After having supper, you should do listening task again. And before sleeping, you can read any page-turner books or any amazing bed-time stories in English. The thing which you read does matter, but you should do due to improving understanding and comprehension abilities. Your day will be full of knowledge and enjoyment. The schedule which is given above may be altered according to you and your health.

1st picture. The levels of CEFR (Common European Framework of Reference)

You do the half of the work by aiming at getting high level and planning your day not to waste your priceless time. Now it is time to take yourselves under control. What does it mean “control” ? You are human and every once in a while it is possible that you make some excuses like being exhausted, feeling bad and etc not to do tasks. I recommend you to make a note to put on your desk or anywhere you can see while you are sitting. In that note you may write some motivational quotes like “I will win not immediately, but definitely” or “A smooth sea never makes a skilled sailor”. Instead of doing this, you can stick the printed photo of Certificate or a hand-making paper which is written “C2 is mine” on. This things make you remember your dreams.

Now it is high time to do tasks according to your agenda, if you do all said rules above, you manage to procure certificate which engage your interest. As well as, during the exam time, you should be much more attentive for both doing tasks and copying your answers to the answer sheet.

Some questions may come on your mind like “Why should I take?” or “Why do I have to take burden of responsibility on my shoulder?”. Moreover, you are not quite enthusiastic about getting Certificate, it is no trouble. But there is a drawback here that you yourselves are not able to estimate your knowledge.

3. Conclusion

Just think about school time: supposing you are pupils, you try to be first for everything due to the fact that teachers praise to the sky and put excellent marks. This situation is nearly always repeated again and again. It resembles getting certificate which is your mark according to your knowledge. Furthermore, it solely helps you to know about you, understand your degree, which stair you are. Also, if you see your achievement, a great amount of proud which makes you strive forward will appear.

On the whole, as everything has their own position in our life, CEFR certificate is a great paper which makes you learn unknown necessary information before and after exam. When you work on yourselves for yourselves by yourselves, you manage to be perfectionist, then all your dreams will come true.
