<sup>2</sup>Student of Uzbek State World Languages University

**Abstract:** For a start, needs analysis aims to present learners' wants and needs. Analyzing the data, the main objectives of this course will be set in order to achieve the viable outcomes.

**Keywords:** Technology, motivation, problem based.

## I. INTRODUCTION

One of the most important abilities to develop in young students is their vocabulary. Having an ample vocabulary is highly beneficial for a student. For example, increasing one's vocabulary improves reading comprehension and writing skills. The quotes from an expert say it clearly: "Effective vocabulary instruction across grade levels and content areas is key in increasing student learning and achievement."

Since of the need of legitimate lexicon, numerous understudies favor to pay somebody to type in their papers. Usually fine. A proficient composing benefit such as CustomWritings.com can be an extraordinary offer assistance to understudies when their workload is excessive. But it is additionally great to extend their lexicon so they can too compose a paper by themselves.

The target learners are 10<sup>th</sup> grade pupils who study at school. The aim of these specific learners is to learn English vocabulary by using innovative technology.

There are demonstrated instructing methods to assist understudies increment their lexicon. Much scholastic inquire about has been done to incorporate cutting edge innovation into distinctive lexicon instructing strategies. The Web and mixed media innovations have the potential to be awesome partners for this purpose. Different computerized instruments can be utilized by instructors to cultivate the intrigued of understudies in learning modern words. Advanced innovation has advanced at immense steps within the final three decades. Subsequently, instructive strategies must too advantage from these progresses.

## METHODS OF NEEDS ANALYSIS

One of the methods of students' activation in the foreign language teaching process is project technology when the pupil plans, creates, protects his projects themselves, i.e. pupils are involved in the process of communicative activity. Tutorial project is a complex of search, investigative, calculated, graphical and other types of work which are realized by pupils themselves with the view of practical and theoretical decision of significant problem.

Thus innovative technologies which were examined significantly enrich foreign languages teaching and make it diverse. Replacing monotonous work new intellectual creative searching form comes where a new type of personality appears. This person is active and purposeful and is oriented to permanent self-education and development.

Instruments that appear the relationship between distinctive words in a content. These incorporate programs like Wordseft, which is a web application. This program permits making word clouds from a content that can be controlled. Another comparative apparatus is Wordsift, too accessible online. These two devices are free; Tools that create digital lexicon field trips. The foremost common program for this instructing approach is TrackStar. This program is available free on the Internet. With this computer program you'll collect distinctive websites to make a lexicon field trip; Tools that permit playing lexicon recreations. There are a few recreations of this sort accessible without charge online. These recreations can incorporate cross word confuses and numerous other bright and engaging ways to have fun and learn.

Foreign languages are getting more important due to the processes of globalization under conditions of modern society. Nowadays foreign language knowledge is an essential condition for any specialists' high qualification. Foreign language learning allows people to broaden their communicative skills, the range of the vision, to raise culture level and etc. English language is a leader among the other languages owing to creation of universal economical, informational and cultural space.

Due to the necessity of learning foreign languages' vocabulary several questions arise: how to teach, what methods to use, how to organize learning process more effectively. For answering these questions it is necessary to research accurately the process of the language acquisition, identify the peculiarities, social and biological factors which influence this process and also identify

similarities and differences during learning native and foreign languages, compare learning in natural conditions and intentional learning.

### III. RESULTS

All these things are the subject of the research for many years and it can identify the following conditions for successful language acquisition. They are:

- Motivation for learning;
- Language abilities, intercultural, social and cultural competency, background knowledge;
- Linguistic environment which gives the opportunity to get and use the knowledge.

It is very important to create positive atmosphere on the lessons. The conditions have to incline to communicate. One of the conditions is linguistic environment which gives the opportunity to speak and use knowledge in practice. Permanent contact with linguistic environment is very important. This is the motivation for learning. If there is no opportunity to learn language in the country of studied language it is necessary to use the experience of using electronic and multimedia resources. New technologies open the great opportunities, give good technical support and optimize learning process.

According to pupil-centred teaching technology in the centre of teaching is a pupil himself, his motives, goals and unrepeatable psychological warehouse. The teacher determines teaching aim of the lesson, organize, direct and correct teaching process on the assumption of pupil's interests, the level of his knowledge and skills in the context of this approach.

Pupils are exceptionally affectionate of innovation. Most of them utilize smartphones. Subsequently, coordination these devices into the classroom will make the lessons more curiously to them. In addition, advanced innovation can ease the reviewing and evaluation processes. For occurrence, a educator can donate assignments online through the utilize of a program. The understudies do their homework and yield it online. At that point, the program grades it. This way, both the instructor and understudies have less things to do.

### IV. DISCUSSION

Another critical perspective in which computerized innovation can significantly offer assistance is making lexicon words important. Most understudies have challenges to distinguish homophones. You'll be able use some programs to form word-to-image affiliations. Of course, you'll be able do that on the board. But utilizing an internet program permits understudies to share their comes about with their peers.

All in all, at the lessons it is necessary to memorize, speak, write, read, listen and analyze the information a lot that is why the teacher should pay special attention to health saving technologies. Using ways of health saving technologies (physical minutes, movable games, different usage of healthy living rules and etc.) gives the opportunity to form stable needs and value orientation of the students to save and strengthen the health.
